

The Multicultural Issues Task Force is always seeking new members who are committed to our charge:

“To facilitate and support the ability of speech-language pathologists, audiologists, and speech-language-hearing scientists across the state of Pennsylvania to meet the communication needs of culturally and/or linguistically diverse populations through the provision and sharing of resources and the promotion of professional development opportunities. We advocate for evidence-based, culturally-competent care for all Pennsylvanians, with a particular focus on historically underserved and underrepresented populations including (but not limited to) those identified by race, ethnicity, language or dialect, national origin, gender identity or expression, sexual orientation, age, religion, socioeconomic status, and/or ability.”
