Speech-Language-Hearing
Association

This session will focus on discussion of assessment and treatment of stuttering. In this interactive presentation, the facilitators will introduce key themes drawn from best practice models, including individualized, comprehensive assessment and treatment that targets all aspects of stuttering. They will then guide case-based discussions focused on working with clients who stutter. Participants will have an opportunity to consult and collaborate on their own cases, and/or gain insights on general best practices in stuttering. The session will emphasize shared learning and reflection, allowing attendees to exchange insights and develop actionable ideas for improving clinical practice within their own workplaces.

Speaker's Bio: Craig Coleman is the Dean of the College of Health Sciences and Human Services at PennWest University. Craig is a Board-Certified Specialist in Stuttering and an ASHA Fellow. Craig currently serves as President-Elect of PSHA, and has previously served two terms as President. Craig also served as Vice President of Planning for ASHA.

Mary currently serves as an Assistant Chair in the Department of Communication Sciences and Disorders at PennWest University. Mary has written numerous research articles on stuttering, focusing on peer perceptions of children who stutter. She developed the InterACT program, which is used in various countries throughout the world to help improve peer reactions toward stuttering. Mary currently serves as Vice-President of Convention Planning for PSHA.
